The CBR600RR in action.

SUPERSPORT SUPREME

Inline fours are the apex predators of the sportbike world. This is the kind of engine that our World Superbike and Supersport riders race. And if you've ever ridden a bike like our CBR600RR it's easy to see why. The engines are super-responsive and high revving. The handling is scalpel sharp. And our CBR600RR combines all that with the light weight of a 600-class machine—and light weight is the key to all sorts of performance benefits. A rare breed these days, fours like the CBR600RR are a delight for track-day use, and outstanding on twisty back roads.
