## ACCESSORIES NC750X

*Do you really need a left lever to enjoy riding?*

*The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. Now entering its 3<sup>rd</sup> generation and downsized to suit mid-displacement bikes, the DCT is completely different from the belt-type transmissions used by most scooters: it is structurally a conventional 6-speed gear ratio transmission, yet electronically controlled when changing speeds. Keep the fun of a manual transmission; enjoy the comfort of an automatic one!*
